 - +. Concept & importance
 - +. Forming a code of ethics
 - +. Difference between ethics & CSR

"We need business to understand its social responsibility, that the main task and objective for a business is not to generate extra income and to become rich and transfer the money abroad, but to look and evaluate what a businessman has done for the country, for the people, on whose account he or she has become so rich".

- Vladimir Putin

BUSINESS SOCIAL RESPONSIBILITY (BSR) INTRODUCTION

What is a BSR?	

What are the accepted definitions on BSR?

"Business social responsibility is the continuous commitment by the business to act ethically and contribute to the economic development while improving the quality of life of the workforce and their families as well as of the local community and society at large."

 World business council for sustainable development

"Business social responsibility is

CORPORATE

SOCIAL

RESPONSIBILITY

about how companies manage the business processes to produce an overall positive impact on society.

- Mallen Baker

"Business social responsibility is to create maximum value for shareholders while performing justly to all interested parties such as consumers, employees, society, government and environment"

Narayan Moorthy -

"BSR is a company's commitment to operating an economically, socially & environmentally sustainable manner whilst balancing the interests of diverse stakeholders".

- BSR Asia

"There is one & only one social responsibility of business to use its resources & engage in activities designed to increase its profits so long as it stays within the rules of the game, which is to say, engages in open & free competition without deception or fraud".

- Milton Friedman

What are the international definitions on BSR?

"BSR is about taking personal responsibility for your actions & the impacts that you have on society".

- USA

"BSR is the contribution to the development of natural & human capital in addition to just making profits".

- Taiwan

"Business social responsibility is about business giving back to the society.

- The Philippines

What is Economic Sustainable Development?
Traditionally economic development was considered as the progress in GDP. It is expected in
Economic Sustainable Development to improve human welfare by enhancing the quality of life, &
reducing the consumption of resources.
It is important here to empower people to have a better standard of living while earning wealth in
engaging in economic activities & providing the present & future generations with prosperity &
protection by confirming a high standard of life style & eradication of poverty of the people
worldwide.
A competitive market is important for this and it is expected to reach an economic sustainable
development by producing eco-friendly products that are affordable.
What are the facts that a business should concentrate on working
towards economic sustainability?
What are the steps that can be taken by a business to ensure economic
sustainability?

What is Environment Sustainable / develop	ment Protection?
There are limited resources in the world for us. Every human being who lives on earth needs clean air, water, suitable habitat to live in as well as fertile land to produce adequate food.	
It is expected to satisfy the basic human needs such as air, water, food & shelter through environment sustainable protection by the quality presence, maintenance & protection of the basic human needs.	
In sustainable environment protection, human activities for the protection of global environment & for the future generation how to do effective changes without destroying the natural env risen such as global warming, destruction of forestry, excessive here.	ironment. Adverse effects that have

What is Social Sustainable Development?	
To ensure a sustainable future, needs & wants of people could	
be satisfied equally/ fairly. In other words, while human needs	
& wants can be fulfilled at a high standard, there shouldn't be	
corruption or violation of others' rights to do so.	
To ensure this position in social sustainable development, it	and the second s
emphasizes on giving equality, social capital, social integrity,	
commitment of community & development of human rights,	
social responsibility & social justice to everyone.	
	WHO THE WAY
It is expected in social sustainable development to have human	
development by satisfying human needs while not violating the ne	eeds of future generations.

Business ethics means to act favorably to all the interested parties acknowledging the good & bad. It is important for businesses to follow business ethics, because;

- By supplying quality goods and services, fairness can be fulfilled, thereby increasing their trust on business.
- By following ethics related to accounting, financial irregularities & misconduct can be avoided by ensuring trust.
- ❖ By following ethics related to the rights and responsibilities of both employers & employees, unfairness by caste, social status, religion or gender can be avoided, thereby leading to a better human resource management.
